

Avijit Saha

Full Stack Developer

+8801629404625 | avijitsh94@gmail.com | [GitHub](#) | [LinkedIn](#) | Narayanganj, Bangladesh

PROFESSIONAL SUMMARY

Full-Stack Developer skilled in React, TypeScript, Node.js, and MongoDB with hands-on experience building production-ready web applications. Proficient in RESTful API design, JWT authentication, real-time systems, and responsive UI development. Passionate about writing clean, scalable code and delivering real-world solutions.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, Zustand, DaisyUI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io

Database: MongoDB, PostgreSQL, Prisma ORM, Mongoose

Integrations: Cloudinary, Resend, Arcjet, Stripe, SSLCommerz, OpenRouter API

Tools: Git, GitHub, Vercel, Railway, Sevala, Postman, Figma

CORE COMPETENCIES

REST API Development, Database Design, Authentication & Authorization, Real-Time Systems, Backend Architecture, State Management, Responsive UI, Performance Optimization

PROJECTS

EventMate — Social Event Platform | *Next.js · TypeScript · Node.js · MongoDB* | [Live](#) | [GitHub](#) june 2026

- Built and deployed a production-grade event discovery and booking platform connecting users with local events, enabling hosts to monetize gatherings through secure payments
- Architected a modular REST API (6 domains: auth, users, events, bookings, reviews, payments) with JWT authentication, Google OAuth, and role-based access control across three user roles (User, Host, Admin)
- Integrated SSLCommerz payment gateway (bKash, Nagad, card) with server-side transaction validation to prevent payment fraud, plus automated email confirmations via Nodemailer
- Built role-specific dashboards with Recharts data visualizations (revenue trends, role/event distribution) backed by aggregation queries on MongoDB
- Implemented dynamic search, multi-field filtering, sorting, and URL-synchronized pagination using Next.js App Router and `useSearchParams`
- Engineered Cloudinary-backed image uploads, a dark/light theme system, and API rate limiting (express-rate-limit) for production security
- Deployed a CI/CD pipeline with Vercel (frontend) and Render (backend), connected to a MongoDB Atlas cluster
- **Stack:** Next.js 14, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Google OAuth, SSLCommerz, Cloudinary, Nodemailer, Recharts

Smart Inventory & Order Management System | *React · TypeScript · Node.js · MongoDB* | [GitHub](#) | [Live](#) Feb 2026

- Developed a complete inventory and order management system with real-time stock tracking and business analytics dashboard
- Built responsive frontend using React 18, TypeScript, and Redux Toolkit, achieving 40% faster page loads through RTK Query caching
- Implemented secure JWT authentication with role-based access control supporting Admin and User roles with bcrypt password hashing
- Created RESTful backend with 20+ API endpoints using Node.js, Express.js, and MongoDB with comprehensive error handling
- Designed interactive dashboard with Recharts displaying revenue tracking, top products, and order analytics
- Implemented automatic stock management preventing overselling through real-time inventory updates on order creation and cancellation
- **Stack:** React 18, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, Recharts, Node.js, Express.js, MongoDB, JWT, Bcrypt

Chatify | *React · Node.js · Socket.io · MongoDB* | [GitHub](#)

2026

- Built full-stack real-time chat app with custom JWT authentication, eliminating reliance on third-party auth providers

- Implemented real-time bidirectional messaging and online/offline presence indicators using Socket.io
- Integrated Cloudinary for image uploads, Resend for transactional welcome emails, and Arcjet for API rate-limiting
- Developed responsive UI with React, Tailwind CSS, and DaisyUI; managed global state with Zustand
- Deployed on Sevalla with MongoDB for data persistence; followed Git/GitHub workflow with branches and PRs
- **Stack:** React, Tailwind CSS, DaisyUI, Zustand, Node.js, Express.js, MongoDB, Socket.io, JWT, Cloudinary, Resend, Arcjet

Library Management System | *React · TypeScript · Node.js · MongoDB* | [Live](#)

Jan 2025

- Engineered a full-stack web application managing 1000+ books with real-time availability tracking
- Developed RESTful APIs with 8+ endpoints using Express.js and MongoDB aggregation pipelines
- Implemented Redux Toolkit Query, reducing redundant API calls by 40% and improving data-fetching efficiency
- Integrated advanced search, filtering, sorting, and pagination for efficient book discovery
- Designed scalable backend structure with Zod validation and clean MVC architecture
- **Stack:** React 18, TypeScript, Redux Toolkit Query, Tailwind CSS, Node.js, Express.js, MongoDB, Zod

EXPERIENCE

Database & Application Support Developer

June 2024 – Present

Staric IT

Dhaka, Bangladesh

- Designed and developed interactive web application interfaces (forms, dashboards, reports) on Oracle APEX, serving 1,500+ internal users
- Wrote PL/SQL procedures, functions, and triggers to implement backend business logic, data validation, and automated workflows
- Implemented client-side interactivity using JavaScript and Dynamic Actions to improve UI responsiveness and user experience
- Automated report generation with Jasper Reports, eliminating manual reporting work and reducing turnaround time for business stakeholders
- Wrote and optimized SQL queries for analytics and reporting, ensuring accurate, real-time data access for 1,500+ users
- Maintained data integrity through structured schema design and validation rules across relational database tables

EDUCATION

Daffodil Institute of IT

Dhaka, Bangladesh

BSc in Computer Science and Engineering | *CGPA: 3.15 / 4.00*

Graduated 2023
